

Amendments to the Specification

- 1) Please insert the following paragraph at page 1, line 3:

This application is a § 371 of International PCT Application PCT/FR04/50352, filed July 23, 2004 which claims priority to French Application No 03/50383 dated July 30, 2003.

- 2) Please insert the following subtitle at page 1, below the above-referenced paragraph:

Field of the Invention

- 3) Please insert the following subtitle at page 1, line 11:

Background

- 4) Please insert the following subtitle at page 3, line 27:

Summary of the Invention

- 5) Please insert the following subtitle and text at page 3, line 34:

Brief Description of the Figures

Figure 1 illustrates the effects of nitrous oxide at 50 vol% and 75 vol% (with the remainder of oxygen) on sensitization to d-amphetamine.

Figure 2 illustrates the effects of xenon at 50% and 75% on sensitization to d-amphetamine.

Figure 3 illustrates the effects of nitrous oxide on the increase in dopamine release in the nucleus accumbens septi induced with d-amphetamine.

- 6) Please insert the following subtitle and accompanying text at page 3, below the Brief Description of the Figures and accompanying text:

Detailed Description of the Invention

The present invention relates to the use of a gaseous mixture containing xenon gas and nitrous oxide gas in order to manufacture all or part of an inhalable medicament for preventing or treating neurointoxication in man.

- 7) Please insert the following paragraph at page 16, line 19:

It will be understood that many additional changes in the details, materials, steps and arrangement of parts, which have been herein described in order to explain the nature of the invention, may be made by those skilled in the art within the principle and scope of the invention as expressed in the appended claims. Thus, the present invention is not intended to be limited to the specific embodiments in the examples given above.

- 8) Please replace the subtitle at page 17, line 1, with the following text:

CLAIMS What is claimed is:
